MOBIUS Access Advisory Committee Report
June 3, 2008

1. The 1st Choice Tracking System is in place. The subcommittee will present "Forum: Making Our Courier System Work for You: The Latest & Greatest in the 1st Choice Courier Tracking System" at this year's conference.

2. A survey was sent out earlier in the year to discover preferences for new courier bags. One company responded to a request for bids. 2000 bags have been ordered and should arrive in June. These new bags will be constructed of the same heavier material as last year's order. They will be of a smaller size, similar to the original bags. The windows will be larger to allow for attached of barcodes.
