

Kansas City Cluster Catalogers Committee  
Meeting Notes  
**Friday, May 16, 2014** 9:30 am  
Jannes Library, Kansas City Art Institute

In attendance: Ted O. (MCC-Penn Valley), Maggi Mueller (SPST) and Jennifer Peters (Rockhurst), Lora Farrell (KCAI)

Of note: Logan has retired from SPST (Saint Paul School of Theology)

There are also a number of staff changes at MBTS (Midwestern Baptist Theological Seminary). Ted O. at MCC will be retiring at the end of June, 2015. Stephanie DeClue at William Jewell will be the president of MOBIUS next year. Jennifer Peters at Rockhurst noted that there is also supposed to be an electronic resources group for the Kansas City cluster.

Avila – we're not sure whether they are replacing Dennis Goodyear with another cataloger or not. He has been gone for almost a year.

SkyRiver records have no 001 line. Lora F. to work with MOBIUS on a macro that will retain sky 001 lines.

RDA: 264 lines – should be tied with our existing 260 lines. We do not need to take the 260 out.

34X and 380 fields – display in our local kc catalog. Should they appear in the MOBIUS catalog? They will be displayed.

Enhanced matching program. Electronic and print records matching in the MOBIUS Union catalog. eBooks and print merge at the MOBIUS level on ISBN or 001.

Jennifer Peters noted the web browser tool that allows Amazon to show when you have a title.  
<http://old.libx.org/>

Pathfinder Pro – Lora demonstrated staging to show the group how it looks.

SCAT table – Jennifer (Rockhurst) Logan & MJ are working on something. It's what you get your statistics from. The religion ones are set up. SQL programming. Stephanie doesn't use them.

229 fields – necessary for a serial title to appear using the Journals index search feature in the OPAC

IUG – API – application program interface. Jennifer Peters went to IUG. You can build an app and take out your data. Jennifer created one for twitter. It's a way to interact with the data in a different way.

The Innovative API is for pulling bib & item data. Apparently Innovative wants to charge for advanced use of this. There's an article in Digital Shift with Kim Massana about this.  
<http://www.thedigitalshift.com/2014/05/ils/innovative-reaffirms-commitment-polaris-ils-new-apis/>

There is an app called Mobile Worklist.

IUG Conference – you can sign up – conferences are available online. There are scholarships available.

Ted O.'s updates – he put Bible headings updates and now they're in the RDA profile and sent to Backstage. Uniform titles on sacred works, personal names/dates.

Backstage offers to do a free remastering of a school's bib records for RDA. Schools doing this: Archway is doing it; MERLIN is doing it and they are way bigger than we are.

Pro – will make everything look the same. If we don't do it, this might cause a problem. They're doing it for free.

Con – could mess something up.

Icons – eMovies – shows up in our local catalog one way and in MOBIUS more generically.

Suppressed records from MOBIUS – We need cluster guidelines for what should be included and what should be excluded.

Authority control in the MOBIUS catalog. Ours is the only one that has authority applied to our Inn-Reach catalog. It costs approx. \$6,500. MOBIUS pays that. Should we keep doing it?

Encore will be on the Inn-Reach catalog – which is supposed to fill a gap. It's on a staging platform. At the bottom you'll see "enhanced search" or "enhanced headings" or something like that. MERLIN apparently wants to keep it.

Chair – representative for catalogers will be Lora F.; access, electronic resources coordinators. Cataloging Chair – meets Quarterly. Next meeting is on July 11<sup>th</sup>. 2pm on a Friday.

Our cluster is in flux. Should we dissolve the committee? Longevity – more people MCDAC list.

New eBooks at Rockhurst. Academic package. Jennifer is looking in the catalog to ensure they're not purchasing duplicates. But she's having trouble figuring out if they don't have some things. Some of the 856 lines have been messed up.

Jennifer has brought up cross cluster communication re: MOBIUS issues. i.e. if Lance is having a problem, could we see their tickets, et c....

MOBIUS Conference- Jennifer P. will be there. CCM – cooperative management – shared repository storage (not for digital archives, but for actual physical books). Big schools do OAI harvesting so Google can search it.

SPST has something with OCLC on their servers. They have their website – a link to their digital collections. Maggi says that their CDM site comes with a package that they paid for. [spst.edu/digital-collection](http://spst.edu/digital-collection).

They received an LSTA grant for \$5,000 in Missouri.

Pictures were done by Historic records grant.

They partnered with the State Historical Society. State Historical Society was paid by SPST to catalog and digitize microfilm.

State Library has professional development grants that you can apply for.

Rockhurst is doing an inventory project this summer. They are using Circa inventory, which Ted at MCC purchased.

IUG Clearinghouse – shows what other people are using.

Rockhurst has off-white shelving to give away.
