WILO COORDINATORS
July 21, 2004
1:30 p.m.
Kansas City Art Institute

Attendance: Kathleen Finegan, Avila University; Laurie Hathman, Rockhurst University; Kenette Harder, William Jewell College; Logan Wright, John Oyler, Saint Paul School of Theology; Craig Kubic, Midwestern Baptist Theological Seminary; Ted Ostazewski and Linda Crabtree, Metropolitan Community Colleges, M.J. Poehler, Kansas City Art Institute

I.   Minutes from last meeting
        Minutes were approved as submitted from the March 1, 2004 meeting.

II.   Selection of secretary
        a. Laurie was approved for a one-year term for 2004-2005 as secretary.

III.   Reports from MOBIUS/WILO meetings
        MCAG – Coordinators
        Ted reported on the July 14, 2004 meeting. MCAG reviewed its purpose and role as an advisory committee. Two additional software programs from Innovative were discussed. One is InnReach Agency Software that would allow holdings in the Union Catalog to be listed in order by library name rather than by cluster. MCO would pay for this enhancement; there may be a slight fee for each site for maintenance. The other software is Output Vouchers in Acquisitions to print accounting vouchers. Clusters must make a decision on each of these software programs by September 1st so that MCAG can make a recommendation.

        MCDAC – Catalog Design
        Kenette reported that Baptist Bible College would have their holdings up on SWAN by the fall semester. The author/title search display on the Union Catalog has been removed by MCO due to problems with the interaction with InnReach.

        MERAC – Electronic Resources
        Laurie reported that her year as chair of MERAC has ended but she remains the WILO rep to MERAC. MERAC may have an alternate representative from WILO for the upcoming year as well. MERAC is working on a survey to send to the clusters concerning which two databases they would like MERAC to pursue for the Database Cafeteria Program for 2004-2005. The state legislature is leaning towards funding life sciences resources in FY 07 so MERAC will be asking questions about databases in those areas as well. Serials Solutions has increased the discount it gives MOBIUS members through the Vendor Direct Program from 10% to 15%.

        MAAC – Access
        Kenette reported that the deduplication project has resulted in 200,000 records being removed from the databases. Pick Up Anywhere training is being done in each cluster. Salmon colored books bands will represent PUA books.

MCMAC – Collection Management
Craig reported that the committee is examining last copy storage. A meeting will take place on August 13th to get feedback from the consortium on statewide approval plans.

IV.   Web Page

KCPL & other library links
In the WILO catalog under "Other Library Catalogs" the link to the catalogs of the Kansas City Public Library and the individual libraries in the Kansas City Library Consortium were broken when KCPL changed their website. The links have been changed so that one link is to the KCPL catalog and the other link is to the KCLC consortium catalog, rather than to the individual catalogs. In the consortium catalog a user can choose to search a specific library or by type of library.

KCAI
On the WILO catalog page KCAI will be placed on the line with the other colleges to keep consistency with the original format: college libraries on the first line, community college libraries on the second line, and seminary libraries on the third line. M.J. would send a request to the MCO Helpdesk to have this change made.

V.   Access issues

Pcodes
Laurie asked about how other sites were using Pcodes. Rockhurst University is considering doing tape loads and wants to possibly use these codes to gather additional statistical information. It was suggested that she talk to Elise Fisher at William Jewell to get an idea of any maintenance issues with these codes. Avila & Midwestern are also using these codes.

Request to Own Site band color
Laurie indicated that she was confused about the band color. If the request is from WILO it's yellow/goldenrod, InnReach is green, PUA is salmon.

Lost Item default charges
M.J. asked for clarification on default prices and feedback on how this worked. In the WILO cluster lost items are $45.00. If a library wishes they might enter purchase price information in the item record and this will supercede the default price. Libraries also have the right to choose not to circulate an item that they feel $45.00 is not adequate as a lost fee at the time of the request.

MARC records for EBSCOhost full text periodicals
Laurie wanted to make the cluster aware that Rockhurst University has asked MCO to look into loading the MARC records for full text journals from Academic Search Elite and other EBSCO databases for possible loading into the online catalog. Since all MOBIUS libraries get the basic EBSCO databases MCO is looking into how the process would work and what procedures would need to be implemented at MCO and at the site libraries if they chose to do this type of load. MCO will share this information with the consortium if they find it could work.

InnReach notices
MCO noticed that WILO InnReach notices did not have the home library code associated with each patron name on the notices. Other clusters have implemented this feature so

that it makes it easier to determine their own patron notices from the cluster notices. WILO would like the home library code to be put above the patron address. Laurie will contact MCO to request this. Craig asked if Pick Up Anywhere notice text could be individualized by site. The consensus was that this could not happen, the text is set for the entire consortium.

VI.   Kansas City Art Institute implementation
M.J. is working on the loan rules for KCAI and needs to know what patron types from the other cluster libraries can borrow from KCAI. Elise Fisher has a list of patron types that can be sent; coordinators can send this information to M.J. as well. Logan pointed out that the other cluster libraries would also need to have KCAI patron types so they can enter this information into their loan rules. KCAI is expecting their data load to be done the week of July 26th. Test data indicated that there were problems with diacritics and mapping. They hope to go live on August 9th; school begins on August 24th. Eventually KCAI hopes to use the Serials and Acquisitions modules, but right now they are concentrating on the basic modules.

VII.   Millennium Silver Enhancements
Kenette asked if anyone had any questions about the Silver Enhancements. John Young at William Jewell has sent a few questions to MCO. No one else had questions at this time. Silver is supposed to be loaded after MCO finishes implementing Pick Up Anywhere.

VIII. Other Business

Millennium Summary Displays
Call numbers now appear in the cataloging summary display screens. Originally we thought we could make several changes in summary display fields, but Innovative has indicated that due to hard coding of fields, additional changes cannot be done at this time.

IX.   Next Meeting
The next year of meetings will be on Wednesday mornings to begin at 9 a.m. Dates and locations:

October 20, 2004   Saint Paul School of Theology
January 26, 2005   MCC Business & Technology Center
April 27, 2005   Midwestern Baptist Theological Seminary
July 20, 2005   William Jewell College
