Kansas City Cluster Catalogers Committee

Meeting Notes   Friday, January 23rd, 2015   9:30 am

Avila University, Hooley Bundschu Library

In attendance:

Stephanie DeClue	William Jewell
Lora Farrell	Kansas City Art Institute
Kenette Harder	Midwestern Baptist Theological Seminary
Elisabeth Lomax	Avila University
Maggie Mueller	Saint Paul School of Theology
Ted Ostaszewski	Metropolitan Community College
Jennifer Peters	Rockhurst University

Minutes of the November 14, 2014 meeting approved, with these comments:

The last KC Catalogers meeting date is November 14th, 2014. The date appeared incorrectly on the meeting agenda for the 1/23/2015 meeting

Report of the 1/9/15 MCDAC meeting:

Enhanced Matching product from Innovative – addressing improperly combined records; Steve noted that the presence of the GMD helps with preventing   combination of an eBook with a print book record; They are still looking for long   term solutions to some problems. Steve noted that a certain level of testing is very   time consuming for iii. Developers are also looking at 33x fields.

MCDAC's purpose as an advisory committee to MOBIUS – Some MCDAC members   feel that as an advisory group we are 'marginalized'. They would like our advisory group to be used for testing of Inn-Reach catalog issues. Note that within a few   days of this meeting an email was sent to the listserv from Donna Bacon addressing   these concerns and noting that the MOBIUS Board was looking at all of the advisory   groups and reviewing the roles and purposes of these groups, with the intention of   providing feedback in June 2015.

INN-Reach Best Practices Task Force Report and Recommendations – this report was   sent out in November. Some cluster members did not get it. MCDAC committee   members need to be sure to forward on reports to all members of the cluster.   Feedback was expected in November. The main conclusion in the report is that the   Inn-Reach catalog IS a discovery tool, even if certain materials are non-requestable.   Email sent to Kathleen Schweitzberger on 1/26/15 noting that there was no   feedback.

Encore is coming to MOBIUS.

A new Sage eBook collection will be added to the Union Catalog.

Old business

KC Cataloging Cluster meeting minutes have been sent to MOBIUS and posted on the MOBIUS website.

INN-Reach Catalog best practices task for report for 7/15/2014 – Feedback was expected in November.

Need for an 'Internet Resource' icon. (Some things are not eBooks). See the UMKC Catalog title: Paleobiology Database, http://laurel.lso.missouri.edu/record=e1000215~S3   – send to Director's meeting?

New business

Change to MARC 020 (subfield q) – Just after the ISBN there is a qualifier, such as 'pbk.' indicating the type of book. These are supposed to have a delimiter q between the ISBN and the qualifier.

Lora to send a request to MCO to load the newest MARC validation codes (so the $q will appear in the 020 lines). These should appear system-wide.   Email sent on 1/26/15, lf

Thoughts on the Encore test site of the MOBIUS catalog.
http://encore.searchmobius.org/iii/encore/?lang=eng

    Do we want 856's to show up – some do not (they appear in the brieflisting)

    Note: the Request button should not be showing up for eBooks –

    The big question with **Encore** is: How powerful is the limiting? (Facets, along the left side of the screen). Under Format, you can click More – you can focus on a certain type of collection. BUT you can't exclude (i.e. – exclude all not-accessible eBooks).

    Note – eBook stats indicate that most users read things online rather than downloading.

    Discussion about universally accessible eBooks – a point was made re: Sage eBooks, and that they are universally accessible. Will the Sage collection have it's own logo, separate from the eMO logo?

    There was an interesting discussion about Copyright. One of the KC Cataloger committee members is the Copyright Compliance officer on their campus. She provided an example of a professor who writes an article and publishes it. That does not necessarily mean that that professor has the right to provide free access to that article. Stephanie D. is the Copyright Compliance Officer at William Jewell. You need permission – Stephanie usually does the footwork.

Subject Headings: Ted noted that he has found some headings on the reports where a uniform title was in a subject heading. Obviously, Uniform titles (130) are not subjects (650). He wants to know why these are all in the catalog.

The 130 happened to be ALCTS.

Jennifer suggests that Ted create a ticket with MOBIUS. Is it possible that something is set up incorrectly in the load.   Also, things like children's books – Baseball stories subject heading is a valid heading, but it shows up as not valid on the report. Motorcycles is another example. Motorcycles is a subject heading, but for some reasons it is showing up as a 130 Uniform title.

Brief discussion on duplicate titles: if you add a record and there is already a bib record, you can transfer the items from one onto the other record, and then delete the record that you added. Some schools have the ability to overlay bib records in the catalog.

Ted is going to send copies of the 949 field.

Lora to send link to the book: Differences between changes within. Maggie was interested, and others will benefit so that they can know when to create or use a new record.
http://www.ala.org/alcts/resources/org/cat/differences

Sage eBook collection: people in the Kansas City cluster are in favor of having them added to the local catalog. Lora to tell the site coordinator (MJ) that we're in favor of this.

Member reports: Penn Valley Director who retired in 2013, Gloria Maxwell, passed away recently.

MBTS- Susan is in Texas. She's working remotely, part time. Kenette, Director of Library Services, attended our meeting. They have 3 full time people.

Rockhurst is almost done with their inventory project. Also, they have a position open.

Brief discussion about the interest from UMKC about a cluster name change (they are known as Merlin). They (UMKC) wanted to know the steps to introduce a cluster name change. Coordinators do this. The MOBIUS office did the design for how our local catalog appears.

KCAI has requestable media. Penn Valley has books on CD that are requestable.

William Jewell is nearly done with inventory. Their collection is 105,000. They have inventoried up to 103,000 – so they're almost done. 20% of their collection is in the 780 call number. A large number of these titles are missing (it's the sheet music call number). They might want to put them in closed stacks. The faculty were not aware of the large amount of loss that they were experiencing.

Rockhurst – inventory – shelf list – many labels are represented incorrectly in the catalog. The items are correct but the call numbers in the catalog are not.

Maggie (SPST) – 3 months extension of books stored at old campus. They're considering them for weeding. They have 3 ranges of VHS. Their faculty have required texts that are packed away in boxes. They need their materials available. She got the list of all of the VHS.

Stephanie (WJ) there is a way to recycle VHS.   Greenfile is a company that will do that. Not sure of the cost.

KC Rehab institute is a book recycler.

Avila renovation – their weeding went on before the move. The stacks are closed at Avila. Books are paged by a person.

Adjourn
