

1. Call to order and introductions
2. Adoption of the agenda
3. Approval of minutes from October 11, 2013 (reviewable at <http://mobiusconsortium.org/node/976> )
4. Information Items:
  - The Backstage RDA profile recommendations document has been added to the MCDAC page.
5. Old Business
  - Internet Archive Missouri State Publications: The State Library sent a list of records with OCLC Digital Archive links. Some of them are still in cluster catalogs and thus in MOBIUS with bad links. In one example, <http://searchmobius.org/record=b19962564~S0> , there is a working link to the document through the agency site; clusters may want to consider keeping these.
  - Matching in MOBIUS: any updates on Innovative's Enhanced Matching program?
  - Institution-specific materials in MOBIUS
  - eMO updates: proceeding as explained?
  - Authority bugs resolved?
6. New Business
  - RDA fields for non-book materials: in addition to the already suppressed 33x fields, do we want to suppress the 34x and 380 fields? It's done in Towers; in MOBIUS see the current display <http://searchmobius.org/record=b28390529~S0> , and in staging with the fields (extra fields under Description) suppressed <http://searchmobius.org:2082/record=b28390529~S0>
7. Adjourn Meeting
8. Minutes to be taken by Denise Pakala
