

Several weeks ago Jessica sent the committee a link to the partially redesigned webpac. We would like your input but have not heard from anyone yet! There is still work to be done.

We can certainly meet on November 18 (I think it was 1:00?) through Adobe Connect to discuss where we are so far if everyone feels the need. Or we can discuss things via the discussion list.

What would everyone like to do? Do we want to catch up with activities online?

Donna

Subject: [Webpactf-l] Next WebPac Meeting Date?

Good afternoon,

I had a notation from our first meeting that we were going to try and meet again online on Nov. 18 (or Nov. 23?). Will we be meeting on one of these dates?

Thanks,  
Erin

Subject: [Webpactf-l] INN-Reach WebPAC redesign update

Good afternoon,

Since the September 23 meeting of the Task Force on WebPAC Maintenance and Design, we've made several changes to the staging version of the INN-Reach WebPAC. You can see the current staging version here:

<http://mobius.umsystem.edu:2082/>

Here are several changes suggested by the task force that you may notice:

- \* The general look and feel of the WebPAC has been updated.
- \* When the users makes a selection from the front page dropdown menu, the example search text changes.
- \* All pages, including the front page, have a small side bar listing search options.
- \* All pages, including the front page, offer the Advanced Search option.

- \* The dropdown menu on the front page has line-breaks for easier reading.
- \* The "save" checkbox has been replaced by a bookcart icon.
- \* The records immediately display the number of libraries that hold a title. (e.g. "2 MOBIUS libraries have this item") The user can then click to see which libraries own the item.)
- \* The record display is broken up into four tabs: Copy Status, More Details, Find Similar Items, and Full Record.
- \* Users are always offered a consistent button, Modify Search, to make changes to their search. (In the past, some searches offered Modify Search and others offered Limit/Sort Search.)
- \* The Advanced Search page has been redesigned.
- \* The Request This Item link is larger and bolder.
- \* A table of institutions and clusters is visible on the screen where users select their cluster. (I plan to reformat this table for easier reading.)

One suggested feature you won't see is the ability to make batch, a feature several cluster WebPACs already have enabled. I've received confirmation from Innovative that this feature is not available for INN-Reach WebPACs.

The redesign is still a work in progress and we have many changes left to make. What changes should we focus on next?

Thanks,

Jessica Hammond
