

MOBIUS Catalog Design Advisory Committee
Agenda
November 4, 2005
10 A.M.

1. Approval of minutes from meeting on July 8, 2005
2. MOBIUS Update
3. Holdings Task Force preliminary report
4. Reverse suppression code demonstration
5. Issues from last meeting
 - a. Authority redirect
 - b. Removing stop words function
6. E-book limit for Central Catalog? Every cluster has an e-book limit but the Central Catalog doesn't
7. Search limit by 007 -- for an example, look at the Advanced Search page in Wash U's catalog. The 'Specific Sound Recording' and 'Specific Video Recording' limits are based on the 007.
8. 710 display issues -- Search World Council of Churches as an author and look at several screens to see what this looks like.
9. OCLC numbers appearing with 'ocm' in front of them in Bridges -- Have any of the rest of you experienced this? Is this a widespread problem?
10. SHARE location code -- How do each of you use this? Only for records for electronic materials? For paper records with an 856 for the freely available online version?
11. Cooperative cataloging of selected electronic collections, e.g. the National Academies Press, or, California Digital Library books.
12. Merging records and links -- The issue is that when you merge records, if some other library has created a link to the deleted record (like on an acquisitions list, or a prof.'s online syllabus), this can be a problem because the record is now gone and the link doesn't work since it is based on bib number, not OCLC number.
