Members Absent:

Anna Zaidman Phyllis Holzenberg Melissa Hopkins Patricia Logsdon	Saint Louis University (PIUS), SLU Drury University, SWAN Mineral Area College, Galahad Washington University (Olin), WashU
---	--

Members Proxies:

Ting James	Saint Louis University (PIUS), SLU
------------	------------------------------------

1. Call to order and introductions
2. Adoption of the agenda
3. Approval of minutes (see attachment)

No one had any feedback so the minutes were approved.

4. Information Items

Jim announced that Quest is in last two weeks of finishing their catalog redesign and it helped quite a bit that some other clusters have gone through the process already.

Jessica announced this will be her last meeting with MCDAC as she will be leaving MOBIUS on August 3rd.

5. Selection of FY2013 Chair

July 13th, 2012, at 2pm via GoToMeeting

No one volunteered to chair the committee for the next year. Vandy made the motion for the chair to rotate and Mary seconded it. Everyone voted yes, so next in line would be St. Louis University, represented by Anna.

6. Unfinished Business

Re-Indexing recommendations (MCDAC Indexing Sub-Group)

Steve emailed the group with proposals from the Sub-Group for re-indexing and Jessica also sent an email discussing the background for the reindexing process (both copied at the end of the minutes). Jim pointed out that the Sub-Group was asking for feedback on the proposals that 650.4, 650.5, and 650.6 be dropped. No member objected to this proposal.

Input was also solicited about the indexing of subfield e in fields X00, X10, and X11 (which MERLIN omits). Denise commented that subfield e will be used with more frequency in RDA records. Since indexing this subfield is not currently causing any problems, it seems better to just leave it indexed rather than remove it from the index and possibly have to add it back.

Since no additional discussion occurred on this topic, Jim said that indexing the subfield e would be accepted for now.

The MCDAC Indexing Sub-Group was setup by MOBIUS, not MCDAC, so it was uncertain if the whole document of proposals should be approved by the committee. Regardless, the motion was made, seconded, and everyone voted affirmative.

7. MERLIN has proposed a change in the text and appearance of the persistent link in the MOBIUS catalog as per the example below:

Current: <http://laurel.lso.missouri.edu:2083/record=b13370870~S0>
Persistent link for bookmarking

Example with both pieces of information:
<http://bridges.searchmobius.org/record=b1472571~S9>.
Permanent Link - <http://bridges.searchmobius.org:80/record=b1472571~S9>

Another example:
Link to this record: <http://hollis.harvard.edu/?itemid=|library/m/aleph|008505169>

Denise commented that she thought it was a good idea. Jessica asked what text to use.

Mary made the motion for the text to read: "Link to this record" which Renee seconded. The motion passed.

8. Other business

Renee inquired what clusters are doing out there to get ready for RDA in terms of training.

July 13th, 2012, at 2pm via GoToMeeting

Jim said that one of the tech services faculty at UCM will be taking an RDA course from Michigan and teaching the rest of the faculty and staff.

Denise recommended an online course from the University of Wisconsin-Milwaukee that only cost \$325. A new session will be starting up in September.

Steve asked whether there needs to be any kind of coordination on the MOBIUS level for implementing RDA in terms of developing best practices to ensure RDA will be implemented in a consistent way across the consortium. This question may be a future discussion item.

Renee mentioned that Springfield has a migration date for Sierra of August 21st. Springfield-Greene will know a little bit more about what the process will be like after that. Jim said that Innovative told them at IUG that staff didn't need further training for Sierra.

9. The meeting adjourned.
