

MOBIUS Web Re-design Overview

•Our Charge

To review existing MOBIUS website (mco.mobius.missouri.edu) and recommend content areas for the public and member sections of the site.

Translating the Charge to Goals...

- Develop content for the public portion and members portion of MOBIUS website.
- Review website functions and determine ideal placement/organization within web content. Discuss possible improvements to these functions
- Review, classify and divide current and possible future web content into intuitive sets.
- Review the design process at regular intervals and keep involved groups informed of progress/problems, while guiding the workflow.

•Background Information

- Audience
 - 3 levels: external, members, mco internal
- The Current Site
 - operating system, content management
- The Future Site
 - operating system, content management

•Overview of the user-centered design process

•User-Centered Design Process

- What is User-Centered Design?
 - Task-based to create “usable” interface.
 - Eliminates navigation “instruction” and other behaviors that compensate for poor design
 - Follows a process: Content, Design, Usability
 - Groups involved: Content Group (Website Taskforce), Design Group (MCO and MOREnet employees), Usability Group (IE Lab)
 - Content Group: roles and responsibilities
 - will discuss this further during meeting

•Resources and Tools:

- User-centered design workflow
- timeline
- wiki,

- Partners: IE Lab, MOREnet, MOBIUS members

- Meeting Outcomes: ideas, assignments, next meeting date
