SWAN Catalogers Meeting
January 23, 2004
1:00 PM – Cottey College

1. Problems re: SWAN Web re-design
   Problems with catalog name change confusion   MSSU could get mixed up with SMSU possibly
   becoming MSU

2. MCDAC (MOBIUS Catalog Design Advisory committee) update
   Freely available in 856 documents -- people know to click and go to actual document Wash U is
   different.

   Swan is about 68% of the DEDUP list and most of them are MO documents

   001 will be the match with OCLC # to keep duplication from happening again in the future

   Pick up anywhere -- MCO doing a phase testing -- not working yet

   We need to keep the clickable location codes

3. AACP (Automation Authority Control Project) going okay?
   AACP is the group that sends the error reports
   Linda stated that the project is not finished yet
   Michelle stated that we should be getting a new batch soon

4. zzzz locations (are the bulk of these errors all SMSU? If so, should we ask MCO to do something different
   with the report?)
   22 locations (error w/no location affiliated)
   We should leave them as Gov Docs
   Michelle stated that maybe is should be given only to SMSU
   Michelle will talk to Gov Docs people to stop doing this

5. OCLC de-duping project [was discussed in conjunction with #6]

6. bcode 3 code m … change to s or z but not n?
   Linda stated that we need to change the "n" code
   Jim Dutton --Don't change "N" records   "N" records already sent to MCO
   Susan thought it was an "s"
   Linda thought it was a "z"
   z -- local no central
   s -- no to both
   BBC catalog will be set up to match & attach with other records currently in the system.

7. Revisit the 240/245 display issue
   245 automatic instead of 240
   Michelle stated that SMS was against it because of the music department
   Linda - foreign language material
   Michelle - some serials

8. AACP and "forced changes"
   Phyllis -- suggest a safe "forced changes"
   Michelle stated that maybe we should in the fall do a workshop. ALL agreed this was a good idea.

9. Limit SWAN OPAC search to large print books
   Maybe resolved when more public libraries may go live

10. Loading MARS deletes records
    Phyllis read a message from Christopher Gould (MCO) means one less report for us. All agree to have this done
    Linda and Michelle told @ postponement email
    If gets fixed then will go for it.

11. OPAC display labels
    Now have 21 characters instead of 12
    Phyllis/Michelle will forward to others in the cluster the TOWERS documents
    It was agreed that the document should be looked at closer before sending
    Michelle will see if Jim has a copy of SWAN like he did of TOWERS
    A decision was postponed until receive a better copy

12. Other issues?
    Linda talked about icodes in association w/OCLC
    Linda will email the withdraw/delete checklist

The next meeting will be on April 16, 2004 at 1 PM at Ozark Technical Community College with Drury University being the backup location.
