

LANCE Minutes

June 26, 2000

The LANCE cluster met Monday, June 26, 2000 at Moberly Area Community College. Present were: Julie Andresen, Robert Lindsey, Tesuk Im, Mary Sims, Leisa Walter, Jean Sidwell, John Davis, Valerie Darst, Sharon Upchurch, Gayla McHenry, Karen McClaskey, Pat Teter, Pam Haslog, Mark Wahrenbrock, Robin Kespohl, George Rickerson, and Jim Dutton.

After introductions, George Rickerson began the presentation on implementation plans for the LANCE cluster. George distributed and explained handouts on INNOPAC Modules, Products, Services; Major Steps in Implementing INNOPAC; Help from Innovative Interfaces; MOBIUS Training Information; and a proposed implementation schedule. Some suggested changes to the proposed schedule were made by LANCE members. Mark will see if the suggestions can be coordinated with III trainer's schedules. The following dates were selected for LANCE site coordinators to meet with Robin Kespohl: July 20 and 27; August 10 and 24; and September 7 and 21, 2000. These meetings will be held at MACC.

After the MCO presentation Pat Teter directed attention to the proposed MOBIUS Indexing Rules (draft policy of 6/14/2000). Pat explained the proposed policy and reminded members that all subject headings on cataloging records incoming from the national cataloging utilities are to be retained by catalogers in MOBIUS member libraries. Pat also brought up authority control for the LANCE catalog and who would be responsible for maintaining authority control after the implementation was completed. No decision was made on this topic. Pat also presented the MOBIUS decision to use the 586 field for recording award winning Children's books (Newberry and Caldicott Awards). The award notation should be inserted into the 586 field when notification of the award is received. Pat will send each member a copy of the Advanced Keyword Searching implementation within INNOPAC document.

The LANCE web page design was discussed. Truman State and KCOM will contact their Graphic Arts departments to see if a logo can be developed for the cluster. Members looked at current MOBIUS members' web pages and cluster web pages in addition to looking at the Colorado State University web page set-up (<http://prospector.coalliance.org>). Suggestions for web page design should be submitted through the institution's site coordinator.
