

The Catalog Design Advisory Committee (CDAC) may, from time to time, receive requests for a liaison to the CDAC from organizations outside of MOBIUS. It is also possible that the CDAC may itself seek a liaison from an outside organization.

The following recommendations are proposed:

1. That decisions on whether or not to authorize a Liaison Position be made by CDAC consensus.
2. That the appointment of the liaison be the responsibility of the outside organization.
3. That Liaison Positions be authorized for a one-year period.
4. That at the end of the one-year period, Liaison Positions may be reauthorized for an additional year by CDAC consensus.
5. That there be no limit on the number of times a Liaison Position may be reauthorized.
6. That authorized liaisons may attend CDAC meetings and take part in CDAC discussions.
7. That authorized liaisons not have voting rights on CDAC
8. That authorized liaisons be added to the CDAC ListServ
9. That decisions on whether to authorize a liaison position take into consideration, but not necessarily be limited by, the following criteria:

a) Can current CDAC members provide the expertise and represent the interests of the specialty area represented by the outside organization?

b) How many of the issues which are CDAC's responsibility impact the specialty area represented by the outside organization and/or on how many of the issues could CDAC benefit from the input of the outside organization?
