

Members Present:

Mary Aycok	MERLIN	Missouri University of Science & Technology
Carol Bennett	Archway	St. Louis Community College
Renee Brumett	SGCL	Springfield-Greene County Library
Bryan Dunlap	MRRL	Missouri River Regional Library
Megan Durham	MCO	MOBIUS Consortium Office
Jim Dutton	Quest	University of Central Missouri
Vandy Evermon	Arthur	Columbia College
Christopher Gould	MCO	MOBIUS Consortium Office
Phyllis Holzenberg	SWAN	Drury University
Melissa Hopkins	Galahad	Mineral Area College
Patricia Logsdon	WASHU	Washington University (Olin)
Andrew McGarrell	Towers	Missouri Western State University
Ted Ostaszewski	Kansas City	Metropolitan Community Colleges
Denise Pakala	Bridges	Covenant Seminary
Steve Wynn	Lance	Truman State University
Anna Zaidman	SLU	Saint Louis University (PIUS)

Members Absent:

[Name], [Group position, if applicable]	[Institution name and, if applicable, Cluster name]
---	---

Guests or Proxies Present:

[Name], [Group position, if applicable]	[Institution name and, if applicable, Cluster name]
---	---

1. Call to order by Renee Brumett
2. Adoption of the agenda
3. Approval of minutes from January 11, 2012
Approved.

4. Old Business

Update on Mat Type icons

There is a mapping issue—Innovative is recontributing WASHU and SGCL records to resolve a mapping issue. Anything that is not mapped will default to the book icon.

Update on 264 fields

MCO is changing the display of 264 tag upon request by clusters.

Update on free content links / decision on formatting of URL

MCO recommended URLs for freely available items be moved up.

5. New Business

OCLC control number

Innovative making changes to accommodate the expansion of the OCLC control number and will update us when it is ready.

WebPAC display issues

Edition: approved

Overflow: approved

Abundant journal volumes: Very long item record displays for widely held titles.

URL checker

Carol Bennett asked what are others using? Merlin was using a third party checker; proxies are a problem; Bridges is using Xenu which is not great, but helpful.

Electronic and print holdings on same master record

Electronic resource vendors are modifying print records and contributing them on OCLC without removing the ISBN for the print edition. This is creating mismatches when cluster records are sent to MOBIUS. The initial match is made on the OCLC record number. When it doesn't find a match, it then searches on ISBN to make the match.

Possible solutions suggested: request vendors remove the print ISBNs; change the matching algorithm; have MCO strip the ISBNs; or live with it.

Mary Aycock suggested putting the print ISBNs in subfield z rather than removing them. Pat Logsdon reported that she opened a call with Innovative in early April on mismatched records in MOBIUS. Kevin Mitchell (Support Engineer, Resource Sharing Services) responded that "the option to recheck the OCLC number of matches is not currently active [on MOBIUS]." Pat asked Christopher Gould (who was online during that portion of the MCDAC meeting) if he would please follow up with Innovative about this. Mary asked for examples which Christopher will send those reported on tickets.

6. RDA updates

Currently, each cluster decides how it will implement RDA with no deadline on submitting. Lance has had preliminary discussions. Steve, Denise, Christopher volunteered to form a working group to review issues related to authority control, etc. Denise asked if other theological sites might want to discuss these issues as a group and offered to share Bridges bible heading decisions.

7. Adjourn Meeting
